Notice is hereby given that tentative approval was given to
Atlas Minerals Corporation by the Utah Division of Oil, Gas, and Mining,
to commence underground uranium mining on portions of Section 14, Township
21 South, Range 14 East, Emery County, Utah. The name of the mine is
the Probe Mine, and the person representing the company in this matter
is Mr. Thomas L. Wilson, Mine Manager, Atlas Minerals Corporation, Big
Indian Mines, Moab, Utah 84532.

Atlas Minerals Corporation has fulfilled obligations under the
Mined Land Reclamation Act of 1975 (Section 40-8, U.C.A., 1953 as amended)
and will employ the following reclamation techniques on 8.9 acres which
comprise the land affected. The land affected is both unpatented mining
claims and lease of mining claims.

During Operations:

- 1) Mining will be conducted in a safe, orderly, and
minerlike fashion.
- 2) Ephemeral drainage traversing the area affected
will be diverted around the operation by means
of an earthen berm.

After Operations:

- 1) Extraneous debris, scrap metal and wood, and
unuseable buildings will be buried or removed
from the site.
- 2) The shaft and ventilation holes will be sealed
with reinforced concrete to prevent accidental
or unauthorized entry.
- 3) Waste rock piles and remaining stockpiles will
be stabilized through regrading and establishing
vegetation through seeding with specified species.
- 4) Surface drainage patterns will be restored by
removing diversion berms and culverts.
- 5) The entire area affected will be stabilized
through establishing specified plant
species through seeding.

Reclamation performance surety will be established upon final
approval of the reclamation plan.
